Hyalite Elementary Afterschool Program

Soup Day

Caitlyn Aakre (MSU education student)

On Oct. 9, students in Hyalite Elementary School's Eagles afterschool program participated in what they like to call, "Soup Day."

Several students participated in making soup, cornbread and butter. Some students cut vegetables. Other students participated in making noodles for the soup, while others helped to make the cornbread.

All students in third-fifth grade participated in making butter for their cornbread (a recipe for the butter is included in this newsletter).

Students in the Eagles program dine on home-made soup and cornbread Oct. 9.

Tech Club

By Catelyn

In Tech Club, we looked up famous people. We learned how to make soil in science. It is fun and awesome. Sometimes I go crazy and I go wild.

This newsletter was made by the 3rd, 4th and 5th graders of the Eagles afterschool program. They wrote, designed and edited. They were assisted by Jessica Sullivan and Caitlyn Aakre, MSU education students.

Kittens

By Olivia

Kittens are soft, cute and cuddly. Kittens are the loving creatures who cuddle with you all the time. I love kittens. They're loving, kind, sweet and adorable. Things that I like about kittens are their tiny noses, cute mouse-like bodies and teeny tiny paws. But just because they're cute and small- it doesn't mean they're always loving. They can scratch you, they can bite you and it really hurts. It can make you bleed which really hurts. But they're not always mean. Kittens are just the way they are and I'll love them just the way they're made.

Recess

By Collin:

Where: Hyalite Elementary School

Why: Because it's good to be in the fresh air.

What: I think we should get more recess because it allows kids to get more exercise.

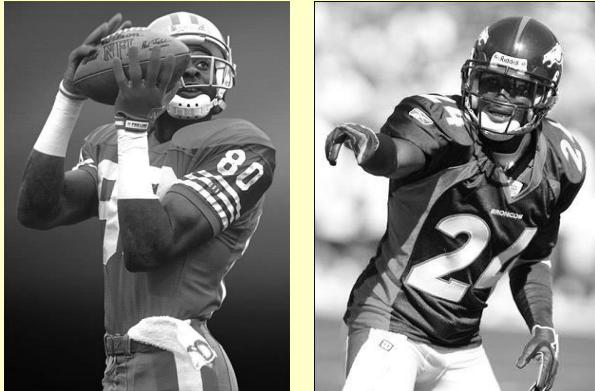

My favorite exercise is playing football.

Some of my friends like to play soccer and basketball and flag football.
